- Violence against women (VAW) **weakens the efforts** to achieve Millennium Development Goals (MDGs) in Indonesia in 2015.
- Women and girls are half of the human capital available to reduce poverty and achieve development. But, women and girls are in subordinate position → high risk for being abused!
- To further achieve the UN SDGs 2030, VAW must be seriously addressed by the GOI.

- Gender-based violence against women & girls challenges human rights, social stability and security, public health, women's educational and employment opportunities, well-being and quality of life, development prospects of children and communities → all are fundamental to achieving the MDGs (Further SDGs)

- Hospital based one stop crisis center (Pusat Krisis Terpadu) (64 hospitals)
- Women desk at Police Stations (305)

# Multisector collaboration

Universitas  
Ahmad Dahlan

- Multisector collaboration is the answer to address women & children survivors' needs for psychosocial and medical care, as well as their access for justice.
- Addressing women & children survivors' needs mean improving their quality of life.
- Government and community must commit to support the effort or eradicating VAW
